NHS Foundation Trust

Seen and Be Heard Study Parent and staff advisory group

We are doing a research study

- To try to improve cancer care for children and young people with or without a learning disability or autism
- We will do this by asking children and young people, parents and hospital staff about their experiences and visiting the wards to see how care is provided

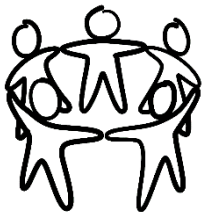

Can you help us?

We are **looking for parents of children and young people with experience of receiving cancer care** to join an advisory group made up of parents and staff

We will ask the group to help us make some decisions, for example:

- What is the best information to give parents, children and young people about the study?
- How can we make information easy to understand?
- What are the best ways to talk with parents, children and young people about receiving cancer care?
- How can we make sure that children with additional needs are included?

How the group will work

- We will **meet 3-4 times a year** and you can choose how many you attend (between January 2024-December 2025)
- The **meetings will last 1-2 hours**
- The meetings will mostly be by online video calls
- We may meet in person at Great Ormond Street Hospital, London
- If we need your help in between meetings, we might get in touch with you by email or phone
- You can get in touch with us by email or by phone
- Please let us know if there is any support that we can provide to help you take part

Being in the group:

- We will pay you for your time in each meeting
- We will pay for your travel to Great Ormond Street Hospital, if we meet in person

Would you like to be in the group and help us with the project?

- Please get in touch if you have any questions about your potential involvement
- You can express your interest using our online form:
